

StayPlanner for Airlines

Overview

More and more airlines are trying to provide a full service experience in their online presence to provide their customers not only the transportation from A to B but a full travel solution.

The StayPlanner gives airlines the opportunity to combine all the additional services they wish to provide their clients into one platform.

Airlines do not need to contact individual providers and integrate various solutions; the StayPlanner will provide it all from hotels, car rentals and up to all the range of travel leisure services. The airline will not only offer an advanced Stay Planning tool but also evolve as source of information for the airline travel community getting inspirations from readymade StayPlanners done by other travelers.

The StayPlanner

The StayPlanner helps airlines customers to plan their stay, search and book leisure activities in the destination.

To view an online demo of the functionality from the traveler perspectives please go to: www.stayplanner.com/help.htm

Leisure services categories: Hotels, Hostels, Car rentals, Restaurants, Music & Sports events, Classic events, Shuttles, Excursions, Shops, Going out and Others.

The airline' customers will arrive to a white labeled StayPlanner which will include:

- Services added/recommended by the Airline
- Readymade StayPlanner done by airline customers
- Calendar will present relevant dates and will include flight time with a link to online check-in.
- All "What's on" in their traveling destination, presented based on a profile built from their booking preferences.
