

StayPlanner for Websites

Overview

StayPlanner is a stay planning tool with BOOKABLE travel leisure services in over 10 categories (i.e. as Sport & Music events, Tours & Sightseeing, Restaurants, Shuttles, Shopping and more). The StayPlanner could complement travel product and provide added value services to customers while earning additional revenues based on Revenue share model. The application is designed as a B2B2C and could be highly personalized for partner needs with many interesting features (including the ability to add content and decide which content to present)

So you don't need to contact individual providers and integrate various solutions; the StayPlanner will provide all range of travel leisure services. You will not only offer an advanced Stay Planning tool but also evolve as source of information for the airline travel community getting inspirations from readymade StayPlanners done by other travelers.

The StayPlanner

The StayPlanner helps your customers to plan their stay, search and book leisure activities in the destination.

To view an online demo of the functionality from the traveler perspectives please go to: www.stayplanner.com/help.htm

Leisure services categories: Restaurants, Music & Sports events, Classic events, Shuttles, Theater & Show, Tours & Sightseeing, Shops, Going out and Others.

Your customers will arrive to a white labeled StayPlanner which will include:

- Services added/recommended by the website
- Readymade StayPlanner done by website users
- All "What's on" in their traveling destination, presented based on a profile built from their booking preferences.
